Case 4:06-cv-02022-CW

1997 Liberty Mutual Certificate of Insurance naming Michael Blatt as an additional insured.

- 4. Attached hereto as **Exhibit 4** is a true and correct copy of two checks written by Michael Blatt to Alexander Anolik trust account on August 30, 2004, totaling \$143,000.
- 5. Attached hereto as **Exhibit 5** is a true and correct copy are portions of the January 23, 2004 deposition testimony of Paul Weir, plaintiff's construction expert in the underlying action, describing his criticisms of the design work of Schnabel Foundation, the drainage and water intrusion property damage, arising out of the Schnabel operations and the construction.
- 6. Attached hereto as **Exhibit 6** is a true and correct copy are portions of the February 17, 2004, and February 18, 2004 trial testimony of Paul Weir describing his criticisms of the design work of Schnabel Foundation, the drainage and water intrusion property damage, arising out of the Schnabel operations and the construction.
- 7. Attached hereto as **Exhibit 7** is a true and correct copy of the Declaration of Melodee A. Yee in Support of Liberty Mutual Insurance Company's Application For Default Judgment by Court in which he describes charges which Liberty Mutual contends are not covered under its policy which amount to \$15,106.13.
- 8. Attached hereto as **Exhibit 8** is a true and correct copy of the Cross-Complaint For Damages and Declaratory Relief in the underlying action, filed with the Court on April 30, 2002.
- 9. Attached hereto as **Exhibit 9** is a true and correct copy of a September 7, 2004 letter from Ronald D. Foreman to Joseph D. Ryan.
- 10. Attached hereto as **Exhibit 10** is a true and correct copy of a March 21, 2002 letter from Ronald D. Foreman to Liberty Mutual Insurance Company's Claims

PROPOSAL

TO: Michael Blatt

5 Merion St.

Sausalito, CA 94965

REF: 435 - 445, & 476 Bridgeway

Sausalito, CA 94965

DATE: 6/9/97

Attention: Mike Blatt

Phone:

(415) 331-9377

FAX:

(415) 331-9377

SCOPE OF WORK

In accordance with the attached GENERAL PROVISIONS OF THIS PROPOSAL, we propose to furnish all materials, equipment and labor to complete the following:

Design, furnish and install approximately 5000 of permanent soil nail walls in accordance with the following documents:

- Architectural plans prepared by Donald Olsen for 435-445 Bridgeway dated May 1, 1997, 1. and for 475 Bridgeway, Rev. 4 date 3-27-97.
- Structural plans prepared by SAABCO for 435-445 Bridgeway dated 5/12/97, and for 475 2. Bridgeway, Rev. 1 date 10-18-96.
- Schnabel Foundation Company plans for 435-445 Bridgeway dated 6/2/97, and for 475 3. Bridgeway Rev. 2 dated 6/9/97.

Our proposal is based on the following conditions:

- We will provide a permanent shotcrete wall (rod finish). The wall will be constructed as 1. indicated on Schnabel's plans. Excavation (by others) shall be as indicated on Schnabel's plans.
- We will test approximately five (5) percent of the nails. 2.
- Membrane curing will be used for the shotcrete walls. 3.
- Foundations for the house and walls at 60 Atwood are supported on firm rock (to be 4. verified by others).
- Subsurface material into which the soil nailing is to be installed is assumed to be 5. weathered rock in the top 5-10 feet, grading to unweathered rock below the weathered zone (to be verified by others).
- A 1:1 slope is to be cut above the soil nail walls. This slope is shown on the Schnabel 6. plans for information only. Responsibility for the design and adequacy of this slope is by others."

In addition to the standard exclusions listed in the attached General Provisions, we specifically exclude the following:

- a. Layout of the wall line.
- h Provisions for routing drainage from behind the wall locations.
- Wall finish other than rod finish. C.
- d. Excavation as required per our plans.
- Drainage V-ditch behind and above the soil nail walls. 3075 Citrus Circie, Suite)50, Walnut Creek, CA 94598; 510/947-1881, FAX 510/947-0418 Atlanta • Boston • Chicago • Denver • Houston • Philadelphia • San Francisco • Washington, D.C.

Page 13 of 92

Proposal for Mike Blatt's Residence 6/9/97, Page 2 of 4

PRICE:

Three Hundred Thirteen Thousand Six Hundred Dollars (\$313,600.00)

In addition to the monthly and final payment provisions listed in the attached GENERAL PROVISIONS, this proposal is based on the following additional provisions:

- First payment of \$35,000.00 upon signing of this Subcontract;
- 2. Second payment of \$100,000.00 one (1) week prior to mobilizing;
- Remaining monthly and final payments to be in accordance with the payment provisions of the attached GENERAL PROVISIONS.

For soil nailing quantities in excess of, or less than that indicated on Schnabel's drawings the following unit prices shall apply:

Add: \$58.00/SF Deduct: (\$36.00/SF)

This proposal is based upon a normal five-day work week of eight (8) hours per day and one mobilization, unless noted otherwise in the Scope of Work above.

Additional Mobilization: \$ Cost plus 25% per each.

If we are delayed due to man-made obstructions or "by others", the following rates shall apply:

Soil Nails: \$ 475 per hour per rig.

This offer to perform the stated work is based solely on this proposal and the attached GENERAL PROVISIONS, and no other document(s), and is valid for thirty (30) days from the

GENERAL PROVISIONS

The Scope of Work and Prices detailed in this proposal are based upon all of the GENERAL PROVISIONS listed below:

1. Coordination - You shall coordinate the projects so that the work can proceed in an orderly, productive and continuous operation. For the items listed, the following will be provided to us free of charge: (A) Soldier Beams: excavation to the tops of the soldier beams shall be completed prior to the start of placing soldier beams; layout of the soldier beams; (B) Lagging: excavation to the back face of the lagging; (C) Underpinning: excavation to the top of the footing shall be completed prior to the start of underpinning work; (D) Tiedowns: the work surface shall be maintained firm and dry; (E) Soil Nailing: the excavation shall be made to within one (1) inch of the back of shotcrete line; (A-E) Additional work required due to over excavation shall be paid as an extra to Schnabel.

Additionally, we shall be provided free of charge: Excavation in approximately five (5) foot lifts, or less if the soil will not stand open; Rock excavation so as not to undermine or otherwise damage our work; A berm around the top of the excavation to prevent overtopping of the retention system by water or debris; Safe access for our personnel, equipment and concrete trucks moving under their own power to and from each work location; Access includes furnishing, placing and maintaining dry, level, firm benches (as specified in the Proposal), and ramps with mats, gravel or other surface materials as required, throughout the project. Benches are to be slightly sloped away from any work area, in order to prevent ponding of water, and are to be wide enough for safe operation of our personnel and equipment, and as specified in the SCOPE OF WORK.

- 2. Temporary Service The following will be provided to us free of charge: 220-volt, 200-amp single phase, 110-volt, 40-sup electrical power, and water under normal city pressure, with all outlets and connections to be located within 200 fact of any work area; job toilets; watchmen services; space for a job trailed 10' x 40' in size; space for fabrication and storage of material to be used in job; spot grades and elevations around the job; and see SCOPE OF WORK for any additional services required.
- 3. Plans and Permission For any Schnabel Foundation Company design, a detailed plan will be furnished, signed by a licensed engineer, showing the original plan on which this price is based. Changes will be made as you request, or as necessary to obtain approval of others, but if such changes result in changed costs, the price shall be adjusted accordingly. Permission to close portions of public space will be obtained by others, as will permission to do portions of this work, including tieback or soil nail installation, on adjacent private property.
- 4. Labor We propose to do this job using union labor, and should labor trouble prevent us from completing this contract, we will be paid for the cost of all work performed to that time, plus a reasonable amount for overhead and profit.
- 5. Utilities The following shall be performed "by others" prior to commencement of our work: power lines closer than legally permissible are to be removed, sheathed or de-energized; utilities along the shoring line are to be uncovered and located, then relocated, resupported or removed, as required to prevent interference with our work.
- 6. Exclusions This price does not include any expense or work in connection with the following: excavation, (except for

underpinning); concrete (except for soldier beams and underpinning); collection and removal of debris and spoil (including shotcrete rebound) from any work location and the site; removal of: overhead or underground manmade obstructions, old footings and footing projections; backfill, tamping, restoration, line and grade work, monitoring, demolition, pumping and site dewatering (including pumping rain water); treated wood; fences, stairways, barricades and handrails; traffic control and flagmen; street cleaning; protection and maintenance of slopes, benches, berms and shoring; fees, permits, deposits, and bonds, liquidated and consequential damages; liability other than for our own negligence, and for negligence of our subcontractors; material testing and inspections other than per our design; removal of any of our work. See, SCOPE OF WORK for any additional exclusions.

- 7. Change Orders Change orders will be in writing and subject to advance approval by Schnabel Foundation Company as to design and price before performing changed work. No back charges will be issued, nor accepted unless 72 hours notice in writing of a condition requiring correction is given with an additional and reasonable amount allowed for its correction.
- 8. Insurance We will indemnify you for damages caused by our negligence. We will maintain the following insurance: a) Worker's Compensation - limits established by state law, b) Commercial General Liability in occurrence form - limits of \$1.5 million (bodily injury and property damage combined per occurrence), \$3 million (general aggregate), and \$2 million (completed operations aggregate) including XCU hazards; c) Auto Liability - limits of \$1.5 million each accident (single limit - bodily injury and property damage combined); d) Umbrella Excess Liability - limits of \$1 million. Additional coverage and limits requested by you, if available, will be provided at cost.
- 9. Payments Our price is based upon payments being made by you to us by the 10th of the following month for 90% (or more if stated in the specifications) of all work done the preceding month, including materials delivered to the site or stored in Schnabel's yard, irrespective of whether you have been paid for such work. Final payment to us, including all retainages, will be made by you to us 30 days after substantial completion of our work stated above, irrespective of whether or not you have been paid for such work. If there are later phases, such as ramp removal or other similar items to be completed at a later date, they shall be treated as separate jobs with an agreed to value withheld, and no other retention will be withheld. Interest at the rate of 1-1/2% per month, or the applicable legal maximum rate if more, shall accrue on all amounts not paid by the times provided above, and shall be paid by you to us monthly. Additional work performed by Schnabel shall be included in monthly progress estimates and paid monthly, without retention being withheld. No charges of any kind are to be made against Schnabel's account unless they are agreed to and signed by Schnabel Foundation Company. In the event any amount due as above provided is not paid when due and we commence legal proceedings to enforce payment, you shall be liable to us for all costs of any such legal proceedings, including reasonable attorney fees based on the time expended by our attorneys. If we are not paid within 30 days after the due dates as above provided, we may suspend work (without liability for damages resulting from suspension) until we have been paid in full for all amounts which have not been timely paid, including amounts coming due during such suspensions, and the cost of demobilization and remobilization.
- 10. Acceptance This proposal may be accepted by your signature, or oral, or written notice to us, that you wish us to perform the work covered hereby, or by asking us to proceed with any part of the said work. Upon acceptance, a contract will exist incorporating the terms hereof. If you wish to use a different form of contract, then we would be pleased to negotiate a contract with terms consistent with proposal and other mutually agreeable terms.

```
past were necessary solely because of a concern that
1
    -organisms, fungi-or toxins were present that would
2
    present a hazard to human health?
3
         MR. ANOLIK: That's been asked and answered. That
4
    was the question.
5
         MS. GLASPY: No, it hasn't been answered.
6
        -THE WITNESS: My observation and review and
7
    -conversation with others regarding the conditions of
8
    -construction between the exterior wood framed wall at
9
    the face of the concrete masonry unit walls and the
10
    shotcrete walls at the rear of the building is such that
11
    -non-decay resistant framing materials and sheeting may
12
   -be-exposed to moisture and relative humidity in an
13
    environment such that the conditions to support the
14
    growth of fungus may exist in the future. Those and
15
    that location of that potential growth is in an area-
16
    -that may communicate environmentally with the living
17
    space, in which case airborne spores could potentially
18
    be present in the environment during future occupancy.
19
        - MR. ANOLIK: I take back my tried to get
20
    -stipulation that we would not be claiming different
21
    things and at this point, we will see what the mold
22
    specialists who have examined the place testified, but
23
    that may be a problem of damages in the case.
24
          MR. RYAN: Q. My question is still to you, sir,
25
```

whether you have formed the opinion that there were areas that either were repaired or in the future will need to be repaired solely for the purpose of avoiding conditions that would be hazardous to human health.

A. It's my understanding that repairs have been performed to improve the drainage conditions at the base of the shotcrete walls that were discharging water into the living spaces. I understand that further repairs have been made to wood framed walls in close proximity to the shotcrete walls at the rear of the building. Those repairs were performed to collect and dissipate water and improve the ventilation between the shotcrete wall and the wood framed walls in order to mitigate the presence of moisture and high relative humidity that may exist.

I believe the success of those repairs regarding the required performance has not yet been established.

assume hypothetically that testimony develops at trial that's essentially along these lines: One expert says it was necessary to repair some wood framing and another expert says no, it's not, it was structurally adequate; to which the counter is offered, well, it may still have been structurally adequate, but it was a site for fungus

```
Schnabel Foundation Company that may be Exhibit 54,
1
    dated June 2nd, 1997, that relate to the construction
2
     and installation of a shoterete wall for 435 445 and
3
    maybe 475 Bridgeway?
4
         A. What date was the drawing you referred to?
5
             You can see them. I believe they are June of
6
     1997:
7
         A. June 2nd?
8
         MR. RYAN: Yes.
9
         THE WITNESS: This appears to be the same set of
10
                Yes, I have reviewed those.
11
             -(Exhibit 119 marked for identification.)
12
         -MR. FOREMAN: Q. Same question. Do you have any
13
     opinions with respect to errors or omissions or
14
     of drawings that were prepared by Schnabel Foundation
15
    Company?
16
             Yes:
         - A.
17
              And what are your opinions with respect to the
18
     Schnabel Foundation Company's drawings?
19
              In general, I believe they were adequate and
20
     appropriate for the project. I do have concerns
21
     regarding the typical drainage strip detail that's
22
     presented on Drawing No. 4.
23
             And what is the criticism that you have on the
24
     drawing on Page 4?
25
```

1.

A. This particular detail indicates the drainage that is to be installed behind the shotcrete wall and the extension of that drainage medium to a perforated pipe downhill of the shotcrete wall. The detail indicates that the drainage mat is to extend below the adjacent concrete masonry wall. And it's my opinion that the concrete masonry unit or wall placed on that drainage medium would impact the performance of the drainage system and prevent discharge of water from behind the shotcrete wall to the downhill collection and dispersion system and would, in effect, trap water behind the CMU wall.

- Q. Any other opinions with respect to the design as shown on Page 4?
- A. I believe it would have been more appropriate to include the perforated pipe in the subgrade collection and dispersion system either behind the shotcrete wall or behind the CMU wall. Although, even in that location, if it were perforated, water would have an opportunity to discharge at the back face of the CMU wall. So in that location, it probably should have been a closed drain. In fact, even the line below the slab as shown should possibly have been a closed line rather than a perforated line. Because the perforated line allows water from the drainage mat to discharge

below the slab. 1 Any other criticisms? 2 It's my understanding that the drainage system 3 uphill of the shotcrete wall is placed periodically, 4 basically at six feet on center, which allows the 5 possible migration of water through the shotcrete wall 6 at the intermediate on-drain spaces. Consequently, I 7 think it may have been appropriate to have a moisture 8 barrier on the downhill side of the wall and additional 9 means to collect water at the interface between the CMU 10 Wall and the shotcrete wall. 11 Any other opinions with respect to the design? 12 I believe those observations or comments cover 13 my opinions. 14 Q. And I take it that those opinions are 15 criticisms of the Schnabel design? 16 Α. Yes. 17 O. Moving from design to construction, do you know 18 whether the drainage was constructed as designed in the 19 Schnabel drawings? 20 A. Could you be specific with respect to what 21 elements and at what period of construction? 22 -Q. If I understand your opinion, your concern is 23 that the Schnabel design can trap water and it won't 24 -discharge; is that correct, because of certain 25

PAUL WEIR, VOL. I - FRIDAY, JANUARY 23, 2004

```
deficiencies in the design?
 1
        A. Yes.
 2
          Q. What I'm asking is, if this had never been
 3
     built, that was simply a hypothetical problem that this
 4
    design could result in. What I'm asking is, let's move
 5
    away from the design, let's go out to the field. Now
 6
     the wall and the drainage is being constructed. Have
 7
    you done any investigation to determine whether the
 8
     actual construction has any of the deficiencies that
 9
     you've complained about that the design would engender?
10
         MR. RYAN: I think his request, for clarification,
11
    has to do with the potential that, the way it looked at
12
    one point in time may have changed thereafter or, in
13
     other words, are you asking what it looked like, his
14
    -understanding of what it was like when Schnabel got done
15
    and before anybody else proceeded?
16
         MR. FOREMAN: Thank you for the clarification.
17
         MR. ANOLIK: - How come when he interrupts you thank
18
    him, and when I interrupt you get mad at me?
19
         -MR. FOREMAN: I don't get mad. I just have to
20
     respond to the objections. I never get mad at you, Al.
21
          Q. Do you have any knowledge of the condition of
22
     the property at the time that the excavation was
23
     completed by Hammond and prior to the installation of
24
    the shotcrete wall by Schnabel as relates to the
25
```

drainage of the uphill side of the property? 1 Α. Yes. 2 What is your personal knowledge of the site? 0. 3 Photographs have been shown to me that document 4 the conditions at the time period that you refer to. 5 And those photographs indicate that the drainage system, 6 as illustrated on Sheet 4 of the Schnabel drawings, 7 appeared to have been in place at that time. 8 MR. RYAN: In simple terms, the paradrain was 9 there. 10 MR. FOREMAN: Q. Do you have any personal 11 knowledge of what the condition of the site was after 12 the Schnabel wall was installed but prior to the Bray 13 construction of any of the building elements? 14 I believe the construction was generally 15 consistent with the illustration of the drawing, Drawing 16 No. 4. 17 And do you have any personal knowledge of the 18 condition of the site after Bray did his construction 19 but prior to the time that Settgast went out and did a 20 manifold retro of the drainage system? 21 From my understanding, clarification, that Α. 22 would cover the time period between completion of the 23 Schnabel's work, up to the time of reconstruction by 24

Travis. Is that correct?

25

Fair enough. Now, within these segments that 1 we talked about, excavation, Schnabel, Bray, Travis, do 2 you have an opinion as to whether or not the drainage 3 system was constructed as designed by Schnabel 4 Foundation? 5 MR. RYAN: I'm going to object that that 6 mischaracterizes the extent of affairs. 7 MS. GLASPY: It's making it more interesting 8 -though: 9 (Discussion off the record.) 10 THE WITNESS: First of all, we need to qualify the 11 various conditions of relationships between the 12 shotcrete wall and the construction downhill. There are 13 a variety of systems that differ from the detail 14 illustrated on Drawing No. 4, which is somewhat generic 15 in nature. My observations on-site and review of 16 information, photographs, videos, reports prepared by 17 others, the downhill extension of the drainage system 18 installed by, apparently installed by Schnabel, does not 19 appear to exist downhill of the shotcrete wall. Excuse 20 me, let me --21 MR. FOREMAN: Q. I want you to assume -- go ahead. 22 -- does not appear to exist downhill of the 23 shotcrete walls where the CMU walls do not exist, nor 24

downhill of the CMU walls where they are constructed

25

adjacent to the shotcrete walls.

1.0

- Q. What I'm driving at is not necessarily who did the hammer and chisel, that would be for someone else to determine later. All I'm trying to find out is, as this thing was built in the field, do you know whether it works or not, the drainage system?
- A. The drainage system, as constructed, does not function and water is discharged into the building at many different locations over the height of the building.
- Q. Do you have an opinion as to who is responsible for the non-functioning drainage system?
- A. Without referring to particular individuals, I could refer to trades that may have been involved in the subsequent construction to Schnabel.
 - Q. What trades do you believe those to be?
- A. Concrete contractor, subcontractor, that would have been involved in the construction of the foundation systems, slab on grades, retaining walls, footings, grade beams. The subcontractor that constructed the CMU walls, concrete masonry unit walls. The general contractor would have been involved in all of those processes.

Individuals that placed the slab on grade may have been a different subcontractor than the concrete

1.3

foundation subcontractor. Individuals that placed subgrade materials below the slab, including gravel, sand, vapor barriers, steel reinforcing. Framing contractors in some instances where the framed walls are immediately adjacent to the shotcrete walls. And depending on the contractual relationship between the general contractor and subcontractors, there may have been a specific subcontractor responsible for subgrade drainage systems.

- Q. Why do you believe that those are the trades that are responsible for the condition in the field that you have offered an opinion on?
- A. Those are the systems, or those trades are responsible for construction of the systems that are immediately adjacent to the shotcrete wall. And the construction of those systems would have impacted or been in contact with the extension of the drainage system installed by Schnabel.
- Q. Do you know whether the problem that you've identified here, this drainage water trapping problem, has been remediated?
- A. A drainage system downhill of the CMU walls has been installed to collect and divert water from behind the CMU walls to a storm drain downhill of the property.
 - Q. Do you have an opinion as to whether that new

system works to discharge the water from the uphill side of the property?

A. It's my understanding that the system is

- performing reasonably well. I'm not aware of studies that have been made to determine the extent to which it's successful or other conditions that may exist which would demonstrate its success.
- Q. And the system that you are in reference to, is this manifold system that was designed by Robert Settgast where they drilled into the wall and put in pipes to discharge water?
 - A. Yes.

- Q. Are there any other issues or concerns relative to the design that you are critical of or the trapping of water or the discharge of water from the uphill side as the condition exists today that you have not offered an opinion on?
 - A. Sorry, could you repeat that, please?
- Q. Sure. Do you have any other opinions as to whether there are any problems associated with the Schnabel wall design or construction?
 - A. By itself, independent of the systems downhill?
 - Q. I want the whole enchilada.
 - A. Perhaps you --
 - MR. RYAN: Can we learn whether the whole enchilada

PAUL WEIR, VOL. I - FRIDAY, JANUARY 23, 2004

two? - 1 A. Drainage mat. 2 Drainage mat. Have you seen drainage mat used 3 to drain behind soil nail type walls? 4 Yes. 5 What methods have you seen to hook up or to 6 dispose of the water carried out from behind the wall by 7 the drainage mat? 8 Generally, the filter fabric that is part of 9 that assembly would extend beyond the supportive part of 10 the drainage mat and extend to a closed drain and wrap 11 around that drain, or a perforated drain, and discharge 12 or allow for the discharge of water into the perforated 13 drain to collect and disperse that water to a downhill 14 collection system. 15 Have you ever seen drainage mat incorporated in 16 some fashion such that it was allowing water to pass 17 through a poured-in-place concrete wall? 18 I don't recall seeing that use of a mat in that 19 system. 20 The same question with respect to bringing it 21 through a CMU wall? 22 Not where the materials, the vertical, 23 load-bearing materials would be in contact with the 24 drainage mat. 25

- Q. Are you giving any consideration to the ability of the materials used in that wall to span the drainage mat?
 - A. I'm sorry, would you read that back, please.

 (Pending question read by Reporter.)

THE WITNESS: Which materials are you referring to?

MR. RYAN: Q. A CMU unit, for instance.

- A. The CMU units, the base course would be set in a grout bed, and that grout bed would impede the flow of material, of water.
- Q. So I take it, you've never seen any sort of system employed, be it something as simple as duct tape, wrapped around the drainage mat in the area where it is going to be encased in other building materials; true?
- A. I don't recall that particular use of duct tape. I think there are other ways to provide the positive drainage that would avoid this type of problem.
- Q. Do you feel you have sufficient expertise and experience and have done sufficient investigation into the standard of practice of soil nail wall designers in the Bay Area in the 1996-'97 time frame to be able to testify as to whether Schnabel's design constituted malpractice?
- A. The extent of the drainage system that we're reviewing in this particular detail is beyond the

dimensions of the soil wall. So my criticism is of the 1 use of the drainage material outside the boundaries of 2 the soil nail wall. Whether it's adequate behind the 3 wall is a question for the geotechnical engineer to 4 The use of the material and its placement, 5 function downhill of the wall is not related to the 6 design and detailing and construction of the soil wall 7 itself, in which case I do feel qualified to comment on 8 the use of those drainage materials. 9 So is it your testimony that Schnabel committed 10 malpractice in this detail? 11 Not necessarily. 12 Somehow it seems to me as if I asked you if 13

Q. Somehow it seems to me as if I asked you if
Schnabel was pregnant, and you either are or you aren't.

Is it true as you sit here today that you are not
prepared to testify that Schnabel committed malpractice
in preparing that detail?

14

15

16

17

18

19

20

21

22

23

24

25

- A. I think the detail could be better and I think it had limited ability to perform. In the preparation of that condition, whether that constitutes malpractice or not, I would have to give some additional consideration to. I think the detail has limitations to provide the necessary drainage that its intended to.
- Q. So is it true that as you sit here today, you are not prepared to testify that Schnabel committed

malpractice with respect to the design of this detail? 1 At this time I would have to give that question 2 some additional consideration. I am critical of the 3 detail. 4 I understand you are critical of the detail. 0. 5 My question is simply whether you are currently prepared 6 to take the additional step beyond being critical of the 7 detail and opine that Schnabel committed malpractice in 8 the design of that detail. Or would you need more 9 information to do that? 10 -A. -I would have to give that consideration. 11 -MR. RYAN: Exhibit 121. 12 (Exhibit 121 marked for identification.) 13 -MR. RYAN: I'm going to show you what has been 14 -marked as Exhibit 121, and I believe the parties have 15 agreed that the court reporter can white out the 16 brackets that appear in the left and right margins, two 17 sets on the first page of the exhibit and one set on the 18 second page of the exhibit, along with "EX D" written 19 the lower right hand corner. 20 Q. Have you ever seen Exhibit 121 before? 21 A. Yes. 22 -Q. Did you play any part in the preparation of 23 -that exhibit? 24 25

-costs, that is not your area of expertise, you are not 1 going to testify to that? 2 A. Right. 3 Thank you. 4 -With respect to you were also asked a 5 question about a Morfin letter, M-o-r-f-i-n, which was 6 previously marked as Exhibit 16. You said you didn't 7 think you saw it or relied upon it. I want to make 8 certain that this letter was not in your mind's eye when 9 you were answering the question (indicating.) 10 That's correct. 11 In your Exhibit 118 -- or is it 118? You are Q. 12 welcome to grab it -- you listed areas by systems. 13 you also talked about corrective work, and you 14 identified areas that you thought were not code 15 compliant and deficient in this 10-page list; correct? 16 Yes. Α. 17 Can you identify for me in Exhibit 118 where 18 there was damage to the property, physical damage to the 19 improvements that were brought about because that item 20 that you found was either deficient, not code compliant 21 or not built to plan? 22 Yes. Although I was -- as represented in 23 Exhibit 118, there are probably other documents that may 24

identify other conditions as well.

Q. When you said "allowed for corrosion," talking about physical damage. Did you actually see corrosion on the steel. Not what may occur in the future. I'm

steel.

27

28

THE WITNESS: What we're looking at is the plywood shear wall that's in direct contact or immediately adjacent to either a concrete block wall that's on top of the shotcrete wall, or the shotcrete immediately adjacent to the wood framing.

Holes have been cut in the plywood so you can see that the -- that the plywood is only about a half an inch away from the -- from the concrete wall. Construction drawings require a minimum separation of two inches.

You can also see now that there's a lack of moisture barrier on the surface of the concrete. There's also a lack of any weather protection on the exterior face of the plywood.

Now, this picture illustrates --BY MR. ANOLIK:

> Q. Refer to the number, please.

	A.	136	and	134	ill	lustra	ate	the	exte	ent t	o whi	lch
soil	and	grou	ıt hav	ve c	olle	ected	on	the	exte	erior	face	e of
the 1	plywo	od,	betwe	een	the	plywo	ood	and	the	cond	crete	wall.

So here we see -- you see grout and concrete waste products, and soil, and organic matter that's piled up against the plywood.

Now if we look back at this picture we see the floor joists --

- Q. That is the picture on number 3?
- A. Yes. We can see the magnitude of the collection of material. The floor joists are two-by-six's at this location. So what we have, this is the plywood that's sitting on the two-by-six, so by the time we get to this level we're up about eight inches. So now we have -- we have soil and concrete organic matter that's collected directly against the floor framing, as well.

So this material collects the water that is intended to migrate through that area to drainage systems. It collects that water, allows water to stand and contact with the -- with the wood framing, and ultimately will lead to decay and deterioration of the framing.

And we have additional photographs that demonstrate the deterioration of the plywood sheeting.

Q. How is that evident?

Asking that to be marked next for identification.

Page 43 of 92

THE CLERK: Plaintiffs' number 137 marked for 1 identification. 2 THE COURT: Counsel seen 137? 3 MR. GOLDMAN: If it's --4 5 MR. ANOLIK: Yes. THE COURT: They haven't seep it. You need to 6 7 let him know. MR. FOREMAN: Is that the photo from the bay .8 9 up? 10 MR. ANOLIK: Yes. THE COURT: No objection, Mr. Ryan? 11 MR. RYAM: No. 12 THE COURT: I'll receive it. 13 (Whereupon, Plaintiffs' Exhibit No. 14 137, a photograph, was marked for 15 identification, and received in 16 17 evidence.) BY MR. ANOLIK: 18 1.9 Can you explain what these holes are, the wood

Q. Can you explain what these holes are, the wood that has been cut away, the purpose of doing that, for what the effect is?

20

21

22

23

24

25

26

27

28

A. Exhibit 137 illustrates the exterior face of the plywood that's exposed to the area — to the cavity between the wood framing and the concrete shotcrete, or concrete masonry walls. You can see the dark stains on this panel is where concrete grout has collected and stood right against the plywood.

In this particular case we see the dark

water stain that exists along the bottom. And these are areas where there's premature deterioration, delamination of the plywood. And the dark stains are also indicative of the type of discoloration --

A JUROR: We can't see.

THE WITNESS: The dark stains are indicative of the kinds of discoloration that's associated with -with dry-rot.

So in these areas there's documentation of soil and organic matter and concrete waste products that are standing up to ten to twelve inches against against the plywood sheeting and the floor framing and the wall framing. These conditions were leading to deterioration of the plywood sheeting and the floor framing.

26

27

- Were you asked to also look into various 0. issues regarding the foundations of the two buildings?
 - Α. Yes.
- And what did you discover in your 0. investigation?
- The foundations were investigated generally in Α. the garage area we can see indicated in board D, this is a representation of the ground floor garage areas. street is out here. This is a common driveway. Then this is the slab on grade for the garage. The area back here is the area that we were looking at in these photographs.

So now we're going to be looking at the garage area and the conditions of construction associated with the concrete and the continued migration of water through the concrete walls. At this area, looking at board 4, these are illustrations or photographs that were made during the reconstruction process either in the garage area along the walls here, the walls here, or the elevator pits, which are in these areas, and the walls along here which are really the interior. These are the entry areas from the street to the building.

Q. What did you discover when you looked at that area that you believe were structural defects?

A. Okay.

Board 4 illustrates some of the water migration that's existing. Here we see the dark stains where water is migrating through the wall. Also the white stains. The white stains are efflorescence. That's a result of water migration through the concrete which is collecting the soluble salts that are part of the cement paste. Then when that material hits the exterior face it crystallizes and results in the white stains that we see.

In the event there is red, so these are areas where we have water migration through the wall. You can see the extent to which it exists.

MR. FOREMAN: Is there a question pending?

I'm sorry.

28

27 MR. ANOLIK: I was having him explain that these are all from the video. THE COURT: So the question -- so the question is what? MR. FOREMAN: I don't know. THE COURT: We need a question. BY MR. ANOLIK: The question is, what did you find when you 0. examined whether there were any defects with the foundation. Α. This is board 2 which further illustrates the extent which water is migrating into the garage and elevator pits. Here we see water standing in the elevator pit up to four inches deep. Here's another photograph that illustrates over 24 inches deep. And in one of the earlier photographs we see -- this photograph, and this photograph -- here's the slab on grade of the garage level. And then we came up approximately up into this area, 22 inches above the slab on grade, then when that wall was punctured you can see the extent to which water is flowing out of the -out from behind the wall. So there's actually hydrostatic head, or standing water in excess of 22 inches above the slab on

grade.

THE CLERK: Plaintiffs' exhibits 138 through

27 150 marked for identification.

THE COURT: Counsel seen the pictures?

Page 47 of 92

MR. FOREMAN: No. I want to make sure I know 1 what we're talking about now. We've got 25 of them 2 3 here. THE COURT: You have to show counsel the 4 5 pictures before you have them marked. I thought you 6 were supposed to it before we got started today. MR. FOREMAN: These are from the video. 8 no objection. I'm making certain they don't go in 9 evidence with all the comments written on them. 10 MR. ANOLIK: Comments will be taken off. 11 Thank you. 12 Continue, Mr. Weir. 13 THE COURT: Okay. Group of exhibits will be 14 received. 15 (Whereupon, Plaintiffs' Exhibits 138 16 through 150, were marked for 17 identification and received in 18 evidence.) 19 THE WITNESS: Okay. So now we see the extent 20 of water migration that exists at this level of the 21 building. Additionally, as this water is migrating 22 through then you have additional water that's collecting 23 behind this wall at the lower levels of the building 24 then migrating into the garage and living spaces at the 25 lower level. 26 Looking at -- now at Exhibit 142. Here's an 27 area where we see efflorescence, the white deposits.

Now we see a photograph taken from the similar area.

Now this one has red discoloration which is associated with rust or corrosion produced -- probably associated with corrosion of the steel in the -- in the concrete or the concrete walls, or the concrete masonry walls.

MR. FOREMAN: I'm sorry. Which exhibit number was that, please?

THE WITNESS: 142.

BY MR. ANOLIK:

. What you see the actual steel oxidizing on the inside, does that have an effect on the stability of the concrete it's in?

A. Yes it does. And there will be considerable deterioration associated with the corrosion of the steel. Reinforcing the -- the steel reinforcing corrosion products occupy a volume of about eight times the volume of the original steel reinforcing. So when you have a bar, that's the size of this pencil, become ten times this size, it generates huge compressive stresses on the -- on the surrounding concrete. Results in cracks in the concrete and ultimately deterioration of the concrete.

That process further exposes the steel to additional and considerably more moisture and greater cyclical deterioration.

- Q. The concrete is pushed away from the steel because of the rusting?
 - A. Yes.
 - Q. All right. Thank you.

with layers of hot mopped tar, then a cap that's resistant to the exposure to the environment.

what we had in this -- in these locations, construction at these two buildings, we had first placement of the hot mon, or the hot tar, directly on the plywood, and then the placement of the first layer of the membrane into that layer. So any subsequent work would be impossible. If the building ever had to be reroofed, that application of the hot mopped tar directly on the plywood would necessitate removal of the plywood at some future time. And in addition, there are flashing elements, angled flashing.

- Q. Can you explain what flashing is, at least in a construction text?
- A. Wherever the wall -- the wall meets the horizontal surface there has to be a sheet metal element. So the weather protection elements of the building envelope on the wall extend down over the vertical leg, and then the membrane or the roofing material for the horizontal surfaces bond to the horizontal leg. Then any water that's on -- falls on the wall, or the horizontal surface, is collected by that flashing then diverted to a drain or a discharge element through the exterior walls of the deck.
- Q. So without that would there be any probability of increased water intrusion due to the elements of where this house is?
 - A. Yes, there would be.

Q. Around the full outside of the unit you have blue lines drawn for drainage and waterproofing deficiencies. What are those deficiencies as compared to the ones we've already seen with the missing pipes?

A. Uphill, or at the base of each of the retaining walls at this level, and at this level, there should be a drainage system. We should have the weather protection elements at the face of the concrete. We should have weather protection at the face of the wood framed walls and we should have drainage elements, horizontal drainage elements that extend around the perimeter of the building.

And those horizontal elements are absent along the entire uphill side of the building. That was what was contributing to the water that we see standing on that horizontal shelf at this location. So this is a view, a plan view here, and what we're seeing, the blue line, is the absent drainage that exists at this location.

- Q. Considering how shallow from Bridgeway into the mountain these units are, those x'd blue lines are all drain standing water?
- A. Yes. These are the areas of -- of the horizontal shelf slab on grade where we have the floor framing extending over these areas and we have water migration at the base of the retaining walls migrating over the horizontal surface and through the floor framing, where the floor framing makes contact with the

it was -- it was a shelf in the -- in the original 1 2 design? Excuse me But I think board C is --Α. 3 represents the roof, not the borizontal shelf. 4 Thank you. There is a horizontal shelf that 5 Ο. you've talked about. I'll find that drawing in a 6 moment but there is horizontal shelf, right? 7 8 Α. Yes. And you've been critical about the fact that 9 0. 10 there's water on that horizontal shelf, light? 11 Α. Yes. And there's a soil -- and a soil-nail wall 12 Ο. below the horizontal shelf, right? 13 14 Α. Yes. If there's water ponding on that horizontal 15 shelf, is that a design issue because water could 16 accumulate and there was no provision made to get the 17 water off of that horizontal shelf? 18 19 Α. No. It appears --MR. ANOLIK: Beyond the scope. We have haven't 20 gone after Schnabel. He did not give any opinion as to 21 22 the Schnabel wall. They're the ones who sued Schnabel. MR. FOREMAN: I'm talking about Don Olsen's 23 24 design. THE COURT: It's overruled. You can answer 25 26 the question. THE WITNESS: Would you repeat the question, 27

28

please.

BY MR. FOREMAN: 1 Sure. My question to you is, do you have any 2 criticism whatsoever, as you sit here today, of Don 3 Olsen's design of the house? 4 5 Α. Some. All right. Do you have any criticisms of 6 0. 7 Schnabel, the soil-nail wall designer and installer? Α. Some, yes. 8 Did you have any criticisms of **Hammond, the 0. excavator who excavated the earth before the foundation 10 we've installed? 11 12 No. Do you have any criticisms of the foundation 13 Q. concrete suscontractor? 14 15 Α. Yes. Do you have criticisms of the framer? 16 0. Yes. 17 Α. And do you have criticisms of the plumbers? 18 0. You talked to Bill about that piping. 19 Installation of the mechanical -- some Α. 20 21 mechanical systems. All right So essentially every trade that 22 Ο. was on this job you have a criticism of right? 23 Well, certainly the ones that I've been Α. 24 speaking of 25 So even by accident no one got this job right, 26 Q., is that fair? 27 28 Α. I wouldn't go that far, but there are some

property as to whether or not it is built in a 1 constructively defective way? 2 Could you rephrase that for me. 3 Did you read the deposition of Mr. Guy Travis? ο. 4 No. 5 Α. Q. Thank you. I want you to assume 6 hypothetically that Guy Travis, the contractor for Mr. 7 Gabbert and Mr. Lincoln, testified he found no physical 8 damage to the property as a result of the moment frame 9 installation. 10 Does that testimony of the contractor for 11 Mr. Gabbert and Mr. Lincola affect your opinion at all 12 with respect to the quality of construction at the job 13 14 site? 15 Α. No. Okay. I want you to further assume that Mr. 16 Ο. Travis testified that he found no physical damage to the 17 property as a result of any code violation. 18 Does the testimony of Mr. Travis, the 19 20 contractor for Mr. Gabbert and Mr. Lincoln, impact on your testimony at all here today? 21 Not with respect to that assumption. 22 23 Let me finally ask you whether -- assume 0. hypothetically that Mr. Travis testified that he found 24 25 no physical damage to the property as a result of any 6 deviation from plan. Does that testimony of the contractor for 27

Mr. Gabbert and Mr. Lincoln impact on any of the

Α. The shotcrete portion? 1 Yes. Ο. 2 Including the installation of the paradrain? 3 Α. Not to the drainage yet. Just the wall Q. 4 portion of it was built as designed? 5 Α. Concrete only? 6 That's right. These are the easy ones. 7 Ο. Well, I just want to be sure that I'm Α. 8 addressing the question properly. 0. Sure. 10 Are you talking about vertically, 11 horizontally? The change in elevations, as exactly 12 represented on the drawings, there are a number of 13 places where variation might take place without 14 compromising the performance. 15 All right. What I'm really ariving at, the 16 0. wall built, as constructed, was vertical here, it was 17 left open at this portion here, fight, it was -- the 18 bottom of the wall meets this horizontal member here, 19 but there's nothing at the bottom, there's concrete then 20 there's building elements at this location, correct? 21 I'm sorry / I don't understand the question. 22 Α. Let me show you poster board 3 23 Q. Beaind this portion of the walk this is the 24 horizontal shelf, correct? 25 Yes. 26 Α. All right. And this is the framing of the 27 dse, this is plywood shear, this is the back portion 28

of the house at this location here, right? 1 Yes. 2 Α. All right. Then there's a gap behind this 3 0. wall, whether one inch or two inches, a gap behind this 4 wall, correct? 5 In some instances -- some instances that void Α. 6 is filled with concrete and soil. 7 Right. That's the spoils from construction, 8 0. right? 9 Generally, yes. 10 All right. And then behind that wooden wall 11 Q. which I've shown here we then come to what's been shown 12 in the picture before it, the soil-nail wall, right? 13 Yes. Although some areas might be the Α. 14 concrete block wall. 15 Concrete block wall is down at this location 16 here, isn't it? 17 Not entirely. Α. 18 Okay. And you're critical of the fact that Q. 19 there's water that's coming out in this location here, 20 21 right? Α. Yes. 22 And this horizontal section, although it was removed and repaired, do you know whether it was built 24 as originally designed by Don Olsen, the architect? 25 I'm sorry. Did you say the horizontal shelf 26 Α.

Q. The framing members -- you showed us a

was removed and replaced?

REPORTER'S TRANSCRIPT OF PROCEEDINGS

JURY TRIAL

WEDNESDAY, FEBRUARY 18, 2004

VOLUME 2

PAGE 162 THROUGH 344

Reported By: KIMBERLEE SCHROEDER, CSR, RPR License No. 11414

:	A. That one is. The one to the right is not
2	nearly so long.
3	Q. Do you know whether this is up on the shelf?
4	In other words, is this an area where there's a shelf?
Ē	A. At the base of the wall, there appears to be
6	a horizontal shelf between the wall and the vertical
7	cut where the workers are visible.
8	Q. So it's not possible to tell from this photo
9	how much material is actually left stacking out from
10	below the completed wall; is it?
11	A. The base of the wall is not visible. We
12	can't really tell. It appears to be perhaps a couple
13	of feet.
14	Q. Is it true that you don't know of anything
15	I should be shoulded
16	restant of the main that is inconsistent
17	with what it was contractually obligated to do?
18	MR. FOREMAN: Objection. Are we talking
19	construction or design?
20	THE COURT: Construction. Overruled.
21	THE WITNESS: I believe that's correct.
22	MR. RYAN: Q. And is it true you have no
23	reason to think that the Paradrain was not installed
24	behind its wall by Schnabel?
25	A. It's my understanding from the drawings I $ m ve$
26	reviewed that the Paradrain was installed on six-foot
27	intervals.
28	Q. Now, turning from the construction that

Schnabel did, as I understand it, you do have concerns over the detail that Schnabel provided as a way to hook up that drain, Exhibit B1. You have a concern with this Schnabel detail; correct?

A. Yes.

- Q. That concern, fundamentally, you wonder whether -- or you have a concern with the possibility that when the new building wall gets constructed, it might compromise the ability of the Paradrain to transmit water?
- A. That's one of my concerns among others as well.
- Q. If this system had been installed as per that Schnabel detail without compromising the ability of the Paradrain, then you would consider that to be adequate; correct?
 - A. No. That's not correct.
- Q. What you indicated you would prefer to see done in this location is to connect the Paradrain to a tight line behind the new building wall; correct?
 - A. In part, yes.
- Q. Now, this Schnabel detail bespeaks a perf pipe. What is meant by that?
- A. It's basically a plastic pipe with holes -- two rows of holes on one side of the pipe.
- Q. Does this drawing also indicate that under the concrete of the garage floor slab there's to be a bunch of gravel installed?

to one of your boards, namely number three, concerning which you testified the other day and in particular to the photo in the lower right.

What does this -- what area does this depict?

- A. That's the rear wall of the garage at 445.
- Q. And is it your understanding that if the Schnabel detail had been followed by the building contractor that when this area was excavated, when the garage slab was cut back, demolished, the gravel taken out, so on and so forth, things dug down, people would have been able to see the Paradrain coming from the stem wall and hooking up to a pipe?
 - A. Yes.

- Q. But the detail that you would prefer had been followed, is it true that on demolishing in that same fashion people would have seen nothing by way of drainage?
- A. Possibly. Although they wouldn't see the amount of water. If a drain line existed behind the pipe as you're suggesting, we wouldn't see the amount of water migrating into the building as currently exists.
- Q. Are you familiar with Mr. Settgast's as-built drawing?
- A. Yes.
- Q. That's Exhibit 7, I believe, in the book.
- 28 Soing to the seventh tab, looking for

Case 4:06-cv-02022-CW Document 42 Filed 10/09/2007 Page 61 of 92 correct? 2 Yes. Α. Is it true as far as you know that system is 3 Ο. 4 working reasonably well? 5 I believe it appeared to be working reasonably well, although last -- just last week or a 6 couple of weeks ago continuing through today there is 7 significant water migrating into the building. 8 9 From where? Q. 10 Along the upper shelf at the base of the shotcrete wall and the concrete slab on grade. 11 12 If that upper shelf area had been built by the contractor as per the structural engineering, the 13 Olsen and the Schnabel plans, would it have been 14 adequate as far as you were concerned? 15 16 I think there are still opportunities for problems to develop, although it would have been a 17 18 significant improvement. Page 56, line 10, through page 57, line 14, 20 question by Mr. Foreman: 21 "You were going to identify for us in the drawings, as I understand it, and you were going 22 to identify whether it's Schnabel, engineering or 23 24 architectural drawing where this slab on drain 25

problem exists.

"Answer: Yes. The slab on drain, the horizontal shelf between the offset showcrete walls as illustrated in the plan on sheet S4,

26

27

repairs.

- Q. Are you aware of there being any indication in the plans anywhere that the shotcrete wall -- I'm talking about the structural plans, the architectural plans, and throw in the Sennabel plans. Are you aware of any place in any of those plans that indicate that concrete masonry unit is to be founded on the shotcrete wall?
 - A. No.
- Q. I understand one of your criticisms in this area above the shotcrete wall to be that drainage wasn't installed?
 - A. I'm sorry. Above the shotcrete wall?
 - Q. On the hill above the shotcrete wall was there to be some sort of means installed to collect the water that runs down that hill and diverted away from the shotcrete wall and/or the structure?
 - A. Yes.
- Q. Do I understand that you feel that wasn't installed?
 - A. That's correct.
 - Q. How many times have you been up behind the
- 23 home to look at that hill?
 - A. I believe twice.
 - Q. While up there you were, as I understand it, not aware there had been some additional improvements made up here?
- 28 A Yes.

other words, we already discussed what it was that was done per Settgast plan and looked at a photo; correct?

A. Yes.

Q. Put that aside a moment.

In addition, do you understand one of the things done to deal with problems along the back wall of the house was the use of some sort of preservative spray applied to wood members back there?

- A. Yes. In addition, there would be improvements made to improve the collection of surface water runoff uphill of the upper shotcrete wall.
- Q. Okay. And then in addition to those three things, improve the drainage on the hillside above, install the Settgast, spray the walls, is it your understanding efforts were made to improve ventilation, air circulation through that space?
 - A. Yes.
- Q. Is it true as you sit here today you can't say one way or another any future repairs will be necessary in that area?
- A. It's my belief -- and I've visited the property three times in the last perhaps two to three weeks, and there is significant water migrating into the building at the level of the shelf.

And I've also taken moisture content readings of the concrete wall. There's significant water migrating through the shotcrete wall. I think that additional repairs are required.

support of Liberty's application for default judgment against defendant Michael Blatt. I have personal knowledge of the facts stated herein. If called and sworn as a witness, I could and would competently testify to the following:

- I have spent significant time reviewing and analyzing the attorney billings 1. relating to the defense of Michael Blatt in the suit entitled Gabbert v. Michael Blatt, et al., Marin County Superior Court, case no. 020477 (the "Gabbert Action") . reviewing these billing invoices, I have located the following charges which Liberty contends are not covered under its policy and which Liberty seeks reimbursement from defendant Blatt under Buss v. Superior Ct., 16 Cal.4th 35 (1997) and Scottsdale Ins. Co. v. MV Transportation, 36 Cal. 4th 643 (2005).
- On the billing summary titled "Detail Slip Listing" dated July 9, 2003, 2. attached as Exhibit "2" to the concurrently filed declaration of Michael Barnette, at pages 11-14, there are a total of eight (8) listings, totaling \$688.50, which reference legal work solely attributable to the pursuit of defendant Michael Blatt's cross-complaint in the Gabbert Action. These defense fees are marked by a single underline.
- On the billing summary titled "Detail Slip Listing" dated July 9, 2003, 3. attached as Exhibit "2" to the concurrently filed declaration of Michael Barnette, at pages 13-17, 21, 23, and 27-29, there are a total of seventeen (17) listings, totaling \$1296.00, which reference legal work solely attributable to defendant Michael Blatt's pursuit of insurance coverage for the Gabbert Action. These defense fees are marked by a double underline.
- 4. On the billing statements dated March 1, 2004 though July 16, 2004, attached as Exhibit "2" to the concurrently filed declaration of Michael Barnette, at

5. A few redactions on these bills were made out of an abundance of caution in order to protect any attorney-client privilege which may exist with respect to these bills in compliance with Clarke v. American Commerce National Bank (9th Cir. 1992)

pages 46-49, 51-53, and 55-56, there are numerous entries, totaling \$13,121.63, which

reference legal work performed after February 28, 2004, after the defense verdict was

issued in Schnabel's favor in the Gabbert Action. These defense fees are circled.

6. Defendant Michael Blatt was properly served in this action yet has not appeared in this action. At no time has our office been contacted by Mr. Blatt or a representative of Mr. Blatt during the pendency of this declaratory relief action.

I declare under the laws of the United States of America, that the foregoing is true and correct and that this declaration was executed on July 21, 2006, in Burbank, California.

Document 42

Filed 10/09/2007

Page 69 of 92

Case 4:06-cv-02022-CW

Defendants and Cross-complainants, MICHAEL BLATT and CATHERINE BLATT ("Cross-complainants" or "the Blatts") allege as follows:

- Cross-complainants MICHAEL BLATT and CATHERINE BLATT are residents of 1. Marin County, California.
- Cross-defendants JAMES GABBERT ("Gabbert") and MICHAEL LINCOLN 2. ("Lincoln") are residents of Marin County, California.
- Cross-defendant TRAVIS BUILDERS, INC. ("Travis Builders") is a corporation 3. doing business in Marin County, California.
- Cross-defendant SCHNABEL FOUNDATION COMPANY ("Schnabel Foundation") is a corporation doing business in Marin County, California.
- 5. Cross-defendant HAROLD JOHN BRAY, JR. ("Bray") doing business as H BRAY' CONSTRUCTION is a sole proprietor doing business in Marin County, California.
- 6. Cross-defendant CHRISTOPHER H. HAMMOND ("Hammond") doing business as HAMMOND CONSTRUCTION is a sole proprietorship doing business in Marin County, California.
- Cross-defendant JOHANN KLEMENZ STOCKLIN ("Stocklin") doing business as 7. STOCKLIN IRON & CONST, is a sole proprietor doing business in Marin County California.
 - 8. All contracts alleged herein were entered into in Marin County, California.
 - 9. Damages prayed for herein are within the jurisdiction of this Court
- 10. Cross-complainants are ignorant of the true names and capacities of Crossdefendants sued herein as Roes 1 through 50, inclusive, and therefore sues said Cross-defendants by such fictitious names. Cross-complainants will amend this complaint to allege their true names and capacities when ascertained.
- Cross-complainants are informed and believe and thereon alleges that at all times 11. herein mentioned each of the Cross-defendants and their predecessors-in-interest was the agent and employee of each of the remaining Cross-defendants or their predecessors-in-interest, and that in doing the things hereafter alleged, were acting within the course and scope of such agency and employment.

26

27

- 12. On September 29, 1998, Cross-complainants entered into an agreement (hereinafter "Purchase Agreement") to sell Cross-defendant Gabbert the real property located at 445 Bridgeway. Sausalito, Marin County, California. 445 Bridgeway was also know as "Casa Splendido." The agreement had an effective date of September 24, 1998. The broker for Cross-complainants, was Douglas Ferguson.
 - 13. The Purchase Agreement provides in paragraph 13 as follows:
 - **CONDITION OF PROPERTY**: The property is warranted by Seller against defective material and workmanship for a period of one (1) year from date of occupancy. All material and subcontractor warranties will be assigned to Buyer. The warranty will apply as to any particular defect only in the event written notice of such defect is received by Seller within one (1) year warranty period. Seller reserves the right to repair or replace any defect in the property. Repair or replacement of a defect will be undertaken as promptly as possible under the circumstances, but in no event will Seller be liable for any special or consequential damages. This warranty does not apply to (a) chips, breakage and missing items which were inspected and accepted during the punch list tour or afterwards; (b) minor settling cracks, normal to home construction, (c) wear and tear arising out of occupancy of the property by Buyer, (d) damage caused by alterations or additions made by others or (e) damage caused by movers.
- 14. On the same day, September 29, 1998, the Purchase Agreement was modified by an Addendum. The Addendum provides, in part:
 - 2. Subject to possible adjustment by the parties [the Blatts and Gabbert] pursuant to paragraph 3 below, the purchase price shall be either:
 - (a) \$2,400,000.00 if both this purchase [445 Bridgeway] and the purchase of the adjacent condominium unit (435 Bridgeway) by Michael P. Lincoln, are agreed to by Seller [the Blatts] and hereafter close concurrently; or
 - (b) \$2,500,000.00 if this purchase closes but the adjacent condominium unit [435 Bridgeway] is not concurrently purchased by Michael P. Lincoln.
- 15. The Purchase Agreement included a list of change orders for the construction of 445 Bridgeway. The real properties at 435 and 445 Bridgeway were sold during construction and were not complete at the time of entering into the Purchase Agreement.
- 16. Cross-complainants allege on information and belief that on September 29, 1998. Cross-complainants entered into a Purchase Agreement with Cross-defendant Lincoln for the

purchase and sale of the real property located at 435 Bridgeway, Sausalito, Marin County. California Cross-complainants allege on information and belief that the Purchase Agreement essentially mirrored the Purchase Agreement entered into by Cross-complainants and Crossdefendant Gabbert.

- On or about February 22, 1999, Cross-complainants and Cross-defendant Gabbert 17. entered into a First amendment to the Residential Purchase Agreement. By the terms of this Amendment to the Residential Purchase Agreement for 445 Bridgeway, it was agreed that Crossdefendant Gabbert would complete the incomplete construction of 445 Bridgeway and that Crossdefendant Gabbert accepted responsibility for the completion of the improvements at 445 Bridgeway. The purchase price was further reduced by \$178,556.84 to a new price of \$2,221,443.16.
- On February 22, 1999, Cross-complainants and Cross-defendant Lincoln entered into 18. a First Amendment to Residential Purchase Agreement for 435 Bridgeway. The First Amendment to the Residential Purchase Agreement mirrored the First Amendment to the Residential Purchase Agreement between Cross-complainants and Cross-defendant Gabbert.

FIRST CAUSE OF ACTION

(Breach of Contract Against James Gabbert and Michael P. Lincoln)

- Cross-complainants incorporate herein by reference paragraphs 1 through 18 as 19. through fully stated herein.
- 20. On or about September 29, 1998, Cross-complainants and Cross-defendants Gabbert and Lincoln entered into a written contract (Purchase Agreement) for the purchase, sale and completion of construction of condominium units located 435 and 445 Bridgeway Avenue. Pursuant to the terms of said Purchase Agreements, Cross-complainants were to provide work, labor, materials and supplies necessary to complete the work of construction for a total price of \$2,400,000.
- In the course of said construction and by virtue of the terms of the contract, the 21. parties agreed to modify the same so that Cross-defendants Gabbert and Lincoln assumed the responsibility of completing the works of construction. The contract documents were modified

1
2
3
4
5
6
7
0

accordingly. Cross-complainants allege on information and belief that substantial changes were made to the original design specifications for 435 and 445 Bridgeway.

22. Pursuant to the terms of the contract, paragraph 13, Condition of the Property. Cross-

defendants Gabbert and Lincoln were to notify Cross-complainants of any issues regarding the construction and provide Cross-complainants with an opportunity to cure the same.

- 23. Cross-defendants Gabbert and Lincoln failed and refused to permit Crosscomplainants to cure any alleged defects. Such failure and refusal of Cross-defendants Gabbert and Lincoln constitutes a breach of the Purchase Agreement. By breaching the Purchase Agreement. Cross-defendants Gabbert and Lincoln are barred from claiming damages by its terms.
- 24. Cross-complainants performed all conditions, covenants, and promises required on their part to be performed in accordance with the terms and conditions of the Purchase Agreement.
- 25. As a direct and proximate result of Cross-defendants Gabbert and Lincoln breach of the Purchase Agreement, Cross-complainants have been damages in amounts according to proof. WHEREFORE, Cross-complainants pray for damages hereinafter set forth.

SECOND CAUSE OF ACTION

(Negligence Against James Gabbert, Michael Lincoln, and Travis Builders, Inc.)

- Cross-complainants incorporate herein by reference paragraphs 1 through 25 as 26. through fully stated herein.
- 27. Cross-complainants allege on information and belief that Cross-defendants Gabbert and Lincoln hired Cross-defendant Travis Builders, Inc. to complete the work in progress at 435 and 445 Bridgeway.
- 28. Cross-complaints allege that Cross-defendant Travis Builders, Inc. is the agent of Cross-defendants Gabbert and Lincoln. Cross-complainants allege that Cross-defendants Gabbert and Lincoln are responsible for any improper construction to 435 and 445 Bridgeway caused by Cross-defendant Travis Builders, Inc.
 - 29. Cross-complainants allege that Cross-defendants Gabbert, Lincoln, and Travis

25

26

Builders, Inc. breached their duty of care to Cross-complainants and failed to exercise reasonable care in that they failed to properly and adequately supervise, inspect, investigate, prepare, modify, alter, or construct any alterations or additions made to the condominium units located at 435 and 445 Bridgeway and that the improvements were not of the quality commensurate with the value of the property nor were they fit for the particular purpose for which they were designed and/or were not free of defects which would not adversely affect the safety or merchantability of the property. Crosscomplainants also allege that Cross-defendants Gabbert, Lincoln, and Travis Builders, Inc. made substantial changes to the original design specifications. Cross-complainants also allege that Crossdefendants Gabbert, Lincoln, and Travis Builders, Inc. failed to monitor the expenses and costs of repairs to 435 and 445 Bridgeway and as a result, the costs for completing the construction have grown exponentially.

- As a direct and proximate and legal result of the negligence of Cross-defendants 30. Gabbert, Lincoln, and Travis Builders, Inc. the works of improvement are defective in an amount not yet fully ascertainable but proof of which will be offered at trial.
- 31. As a further, direct and proximate result of the negligence of Cross-defendants Gabbert, Lincoln, and Travis Builders, Inc., Cross-complainants will incur or have incurred repair loss, legal expenses and other costs of inspection and/or reports in an amount not yet fully ascertainable but proof of which will be offered at trial. Cross-complainants are informed and believe that the sum exceeds the amount of \$25,000. Cross-complainants will seek leave of court to amend this cross-complaint to add such sums as they become known.

WHEREFORE, Cross-complainants pray for damages hereinafter set forth.

THIRD CAUSE OF ACTION

(Declaratory Relief Against Schnabel Foundation Company, Harold John Bray, Christopher Hammond, and Johann Stocklin)

- 32. Cross-complainants incorporate herein by reference paragraphs 1 through 31 as through fully stated herein.
 - 33. As part of its written subcontract with Cross-complainants, Cross-defendants

Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin entered into an indemnity agreement with Cross-complainants under which Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin expressly agreed to indemnify and keep harmless Cross-complainants from any claims, damages, losses and expenses arising from or related in any manner to work Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin did at 435 Bridgeway and 445 Bridgeway.

- 34. In or about March 2002, Cross-complainants gave Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin notice of the action brought by Plaintiffs Gabbert and Lincoln and demanded defense and indemnity. To date, Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin have refused Cross-complainants' tender.
- 35. An actual controversy has arisen and now exists between Cross-complainants and Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin in that Cross-complainants contend, and Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin deny, the following:
 - a. That, as between Cross-complainants and Cross-defendants Schnabel
 Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin,
 responsibility, if any, for damages claimed by Plaintiffs rests on Crossdefendants Schnabel Foundation, Harold John Bray, Christopher Hammond,
 and Johann Stocklin; and
 - b. That, as a result, Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin is obligated to indemnify and keep harmless Cross-complainants from any sums or expenses that Cross-complainants may incur or be compelled to pay as the result of any claims, damages, judgment, or award recovered by Plaintiffs against Cross-complainants.
 - 36. Cross-complainants desire a judicial determination of the respective rights and

12

14

16

20

23

25

26 27

28

duties of Cross-complainants and Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin with respect to the damages claim by Plaintiffs herein. Specifically, Cross-complainants desire a declaration, if Plaintiffs' complaint is found to have merit, that Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin is responsible to expressly indemnify Cross-complainants for any such sums that Crosscomplainants may be compelled to pay or cost that it incurs because of the work by Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin or for which Cross-defendant Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin are determined to be responsible, entirely or in part.

Such a declaration is necessary and appropriate at this time in order that 37. may ascertain its rights and duties with respect to the complaint by Plaintiffs. Furthermore, the complaint of Plaintiffs and this cross-complaint by the Blatts arises out of the same event and transaction, and the determination of both in one proceeding is necessary and appropriate to avoid a multiplicity of actions that would result if Cross-complainants are required now to defend Plaintiffs' complaint and then to bring a separate action for indemnity against Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin for sums that Crosscomplainants may be compelled to pay to Plaintiffs as a result of any damages, judgment, or award recovered by Plaintiffs against Cross-complainants.

WHEREFORE, Cross-complainants pray for judgment as set forth below.

FOURTH CAUSE OF ACTION

(Express Indemnity Against Schnabel Foundation Company, Harold John Bray, Christopher Hammond, and Johann Stocklin)

- 38. Cross-complainants incorporate herein by reference paragraphs 1 through 37 as through fully stated herein.
- As part of its written subcontract with Cross-complainants, Cross-defendants 39. Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin entered into an indemnity agreement with Cross-complainants under which Cross-defendants Schnabel Foundation,

Harold John Bray, Christopher Hammond, and Johann Stocklin expressly agreed to indemnify and keep harmless Cross-complainants from any claims, damages, losses and expenses arising from or related in any manner to work Cross-defendants Schnabel Foundation, Harold John Bray Christopher Hammond, and Johann Stocklin did at 435 Bridgeway and 445 Bridgeway

- On or about January 29, 2002, Plaintiffs Gabbert and Lincoln brought an action 40. against Cross-complainants herein to recover damages for the alleged failure to deliver 435 and 445 Bridgeway to Plaintiffs as required by the Purchase Agreement. Plaintiffs allege, among other things. that 435 and 445 Bridgeway had the following defects: Required hold-downs were missing from the elevator shaft as was required shear wall; walls were missing sill plate and were not built to plan; steel beaming used that failed to comply with design plans; through bolts were missing as was wood beam packing; steel beams were not correctly packed; welded bolts were used instead of through bolts; hold-down straps for shear to beam attachment missing; excess plywood packing causing "speedbumps"; missing beam bolts; improper stair risers; shear walls incorrectly connected to joist blocking; garage walls not built to plans but built too low; no foundations installed as required in plans; tie downs incorrectly installed; missing deck flashing; missing ceiling vents roof showed signs of failure; improper number of roof drains; vapor barriers missing; insufficient drainage because of the lack of exit routes; stair cases did not meet code requirements; fire sprinkler system failed to meet code and other defects unknown at this time.
- 41. In or about March 2002, Cross-complainants gave Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin notice of the action brought by Plaintiffs Gabbert and Lincoln and demanded defense and indemnity. To date, Crossdefendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin have refused Cross-complainants' tender.
- 42. Cross-complainants have performed all the conditions and obligations to be performed on their part under their with Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin.
 - By reason of the foregoing, Cross-complainant is entitled to be indemnified by 43.

25

Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin in an amount to be proven at trial if Plaintiffs' are successful on their complaint.

44. In defending this action Cross-complainants necessarily and reasonably will and have incurred and paid attorney's fees and other legal costs to be proven at trial.

WHEREFORE, Cross-complainants pray for damages hereinafter set forth.

FIFTH CAUSE OF ACTION

(Implied Contractual Indemnity Against Schnabel Foundation Company, Harold John Bray, Christopher Hammond, and Johann Stocklin)

- 45. Cross-complainants incorporate herein by reference paragraphs 1 through 44 as through fully stated herein.
- Beginning in 1997, Cross-complainants and Cross-defendants Schnabel Foundation, 46. Harold John Bray, Christopher Hammond, and Johann Stocklin entered into written contracts whereby Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin agreed to supply certain work to be constructed at 435 and 445 Bridgeway.
- 47. On or about January 29, 2002, Plaintiffs Gabbert and Lincoln brought an action against Cross-complainants herein to recover damages for the alleged failure to deliver 435 and 445 Bridgeway to Plaintiffs as required by the Purchase Agreement. Plaintiffs allege, among other things, that 435 and 444 Bridgeway had the following defects: Required hold-downs were missing from the elevator shaft as was required shear wall; walls were missing sill plate and were not built to plan; steel beaming used that failed to comply with design plans; through bolts were missing as was wood beam packing; steel beams were not correctly packed; welded bolts were used instead of through bolts; hold-down straps for shear to beam attachment missing; excess plywood packing causing "speedbumps"; missing beam bolts; improper stair risers; shear walls incorrectly connected to joist blocking; garage walls not built to plans but built too low; no foundations installed as required in plans; tie downs incorrectly installed; missing deck flashing; missing ceiling vents roof showed signs of failure, improper number of roof drains; vapor barriers missing, insufficient drainage because of the lack of exit routes; stair cases did not meet code requirements; fire sprinkler system failed to meet

code and other defects unknown at this time.

- 48. Cross-complainants are informed and believe and therefore allege that any construction defects proved by Plaintiffs are not the fault of Cross-complainants but are the faults of others who performed work on 435 Bridgeway and 445 Bridgeway, including Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin.
- 49. The damages recovered by Plaintiffs, if any, against Cross-complainants will be caused primarily and ultimately by Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin's breach of their contract with Cross-complainants. Cross-complainant's liability for these damages arose, not as a result of any actual fault on their part. but solely by operation of law, arising from imputed liability.
- In or about March 2002, Cross-complainants gave Cross-defendants Schnabel 50. Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin notice of the action brought by Plaintiffs Gabbert and Lincoln and demanded defense and indemnity. To date, Crossdefendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin have refused Cross-complainants' tender.
- By reason of the foregoing, Cross-complainants are entitled to indemnity from Cross-51. defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin in an amount to be proven at trial.

WHEREFORE, Cross-complainants pray for damages hereinafter set forth.

SIXTH CAUSE OF ACTION

(Equitable Indemnification Against Schnabel Foundation Company, Harold John Bray, Christopher Hammond, and Johann Stocklin)

- 52. Cross-complainants incorporate herein by reference paragraphs 1 through 51 as through fully stated herein.
- Beginning in 1997, Cross-complainants and Cross-defendants Schnabel Foundation, 53. Harold John Bray, Christopher Hammond, and Johann Stocklin entered into written contracts whereby Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and

Johann Stocklin agreed to supply certain work to be constructed at 435 and 445 Bridgeway.

- On or about January 29, 2002, Plaintiffs Gabbert and Lincoln brought an action 54. against Cross-complainants herein to recover damages for the alleged failure to deliver 435 and 445 Bridgeway to Plaintiffs as required by the Purchase Agreement. Plaintiffs allege, among other things, that 435 and 444 Bridgeway had the following defects: Required hold-downs were missing from the elevator shaft as was required shear wall; walls were missing sill plate and were not built to plan; steel beaming used that failed to comply with design plans; through bolts were missing as was wood beam packing; steel beams were not correctly packed; welded bolts were used instead of through bolts, hold-down straps for shear to beam attachment missing, excess plywood packing causing "speedbumps"; missing beam bolts, improper stair risers, shear walls incorrectly connected to joist blocking; garage walls not built to plans but built too low; no foundations installed as required in plans; tie downs incorrectly installed; missing deck flashing; missing ceiling vents roof showed signs of failure; improper number of roof drains, vapor barriers missing; insufficient drainage because of the lack of exit routes; stair cases did not meet code requirements; fire sprinkler system failed to meet code.
- Cross-complainants are informed and believe and therefore allege that any 55. construction defects proved by Plaintiffs are not the fault of Cross-complainants but are the faults of others who performed work on 435 Bridgeway and 445 Bridgeway, including Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin.
- The damages recovered by Plaintiffs, if any, against Cross-complainants will be 56. caused primarily and ultimately by Cross-defendants Schnabel Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin's breach of their contract with Cross-complainants. Cross-complainant's liability for these damages arose, not as a result of any actual fault on their part, but solely by operation of law, arising from imputed liability.
- In or about March 2002, Cross-complainants gave Cross-defendants Schnabel 57. Foundation, Harold John Bray, Christopher Hammond, and Johann Stocklin notice of the action brought by Plaintiffs Gabbert and Lincoln and demanded defense and indemnity. To date, Cross-

SUMMONS FOR FIRE AMENDED CROSS-COMPLAINT (CITACION JUDICIAL)

NOTICE TO CERTAIN (Aviso a Acusado) PLAINTIFFS AND CROSS-DEFENDANTS:

(SEE ATTACHED CAPTION SHEET FOR PARTY NAMES)

(SOLO PARA USO DE LA CORTE)

AUG 2 9 2002

JOHN P. MONTGOMERY, Court Executive Officer
MARIN COUNTY SUPERIOR COURT BY: R. FORD, DEPUTY

YOU ARE BEING SUED BY (A Ud. le esta demandando)

DEFENDANTS AND CROSS-COMPLAINANTS: MICHAEL BLATT and CATHERINE BLATT

> You have 30 CALENDAR DAYS after this summons is served on you to file a typewritten response at this court.

> A letter or phone call will not protect you; your typewritten response must be in proper legal form if you want the court to hear your case.

> If you do not file your response on time, you may lose the case, and your wages, money and property may be taken without further warning from the court.

> There are other legal requirements. You may want to call an attorney right away. If you do not know an attorney, you may call an attorney refer-ral service or a legal aid office (listed in the phone book).

Después de que le entreguen esta citación judicial usted tiene un plazo de 30 DIAS CALENDARIOS para presentar una respuesta escrita a maquina en esta corte.

Una carta o una llamada telefónica no le ofrecerá protección; su respuesta escrita a máquina tiene que cumplir con las formalidades legàles apropiadas si usted quiere que la corte escuche su caso.

Si usted no presenta su respuesta a tiempo, puede perder el caso, y le pueden quitar su salario, su dinero y otras cosas de su propiedad sin aviso adicional por parte de la corte.

Existen otros requisitos legales. Puede que usted quiera llamar a un abogado inmediatamente. Si no conoce a un abogado, puede llamar a un servicio de referencia de abogados o a una oficina de ayuda legal (vea al directorio telefónico).

Re: Gabbert and Lincoln v. Blatt, et al

Dear Joe:

In accordance with our conversation, enclosed is a Stipulation for Substitution of Attorney for the appeal of the above-referenced matter. I will forward the Substitution to the Blatts for their signatures as soon as you sign and return the Stipulation to us.

As discussed in our conversation, the designation of record on appeal must be done immediately by your firm as the reasons set forth hereinafter. The deadline for filing was August 31, 2004. The clerk of Marin Superior Court served a notice of failure to cure default on September 1, 2004. Jackie Hamilton checked the Court of Appeal docket. The Court of Appeal is in receipt of the notice of failure to cure default and they are in the process of preparing the dismissal order.

As we also discussed, the break-down of the attorneys' fees settlement leads to a whole host of problems which you described to me. They include the following: the need to address the Appellate Court default; the designation of record; the posting of a bond to prevent execution of the judgment on the Blatt assets; the cost of the reporter's transcript, and other items which we may have discussed but which are omitted from this letter. On balance, if the Gabbert/Lincoln-Liberty Mutual attorneys' fee dispute is promptly resolved all of these issues go away. Based upon your report and my conversation with Mike Barnette, that does not seem likely. As I have expressed to everyone from the beginning Mike Blatt wants this matter behind him as it impacts on his real estate business. The intent of the appeal was to protect Mike Blatt's legal rights and

FOREMAN & BRASSO

Gabert v. Blatt
September 7, 2004
Page 2 of 2

give Liberty Mutual the opportunity to negotiate a fee payment deal or pursue the appeal. As we know Liberty Mutual wanted to hire your firm to do the attorneys' fee appeal. This was expressed by me to you and Mike Barnette and I always anticipated that we would be out of this matter by the time Mike Blatt paid the damage judgment. Mike Blatt paid the damage judgment last week. As the costs have also been paid to Gabbert and Lincoln, only the attorneys' fee issue remains. The filing of the Stipulation for Substitution of Attorney should not get in the way of the filing of a Designation of Record by your firm to protect the appeal.

Enclosure

TO WHOM IT MAY CONCERN:

Please understand that this office represents an additional name insured under the Liberty Mutual policy, Michael Blatt. By this correspondence, I am tendering for defense and indemnification the enclosed complaint. Although the complaint reads January 29, 2002, as the filing date, service was accepted on March 7, 2002, and a response will not be due until April 6, 2002.

Please understand that this office has represented Michael and Catherine Blatt in the past and will be representing him in any claims not covered by the Liberty Mutual policy of insurance. To the extent that there is coverage for the claims made under this policy, we are offering to represent Liberty Mutual and Michael Blatt. This office is experienced in construction defect and meets all requirements under Civil Code Section 2860.

I welcome your reply.

Very truly yours,

FOREMAN & BRASSO
